

Veolia - investment capacity to 31/12/2027 under the leverage commitment

Capstone Subject 2 - perimeter: Financial capacity. Workshop 2 working model.

Question: how much can Veolia commit to acquisitions between 1 July 2026 and 31 December 2027 while ending 2027 at net debt / EBITDA $\leq$ 3.0x?

How to read it

Inputs - every hard-coded number, with document, PDF page and how it was derived. Blue = input, yellow = judgement call to defend.

Spent - Block 1: what has gone out against the EUR 4bn GreenUp envelope, gross and net of disposals.

Start - Block 2: starting position (net debt, EBITDA, leverage, maturities, liquidity) and the two net-debt figures that do not reconcile.

Engine - Blocks 3-4: one column per case. Green cells link to Inputs; blue cells in a case column are that case's overrides.

Summary - the capacity range by case and the three sources of capacity (retained FCF, disposals, leverage headroom).

Tornado - Block 5: one-way sensitivities ranked by swing, computed from the Engine.

Rating - cross-check against the agency trigger (Moody's FFO/net debt). Low confidence until the PDF is read.

Method (Engine)

NFD Dec-26 = NFD Jun-26 - net FCF H2-26 + dividends/coupons H2-26 + buyback - disposals H2-26 + FX/other

NFD Dec-27 before new M&A = NFD Dec-26 - net FCF 2027 + all dividends & hybrid coupons 2027 + buyback - disposals 2027 + FX/other

Max NFD Dec-27 = leverage cap x EBITDA 2027 (EBITDA net of what the disposals take away)

Capacity = (Max NFD - NFD before M&A) / (1 - cap x f / deal multiple), f = share of acquired EBITDA counted in the 2027 ratio (0 = none, 1 = full pro forma)

Definitions follow Veolia's own (H1-2026 report, PDF p.31): leverage = NFD incl. IFRS 16 / EBITDA incl. IFRS 16; net FCF is before dividends and financial investments.

Rule followed: no number in this workbook was typed in as a result. Results are formulas over sourced inputs.

Investment capacity to 31/12/2027 - summary (EUR m)

Line	Base	GreenUp met	Downside	Upside
NFD 30/06/2026 (actual)	24,548	24,548	24,548	24,548
NFD 31/12/2026e	22,982	22,982	23,100	22,882
Leverage 31/12/2026e	3.08x	3.08x	3.09x	3.06x
Check vs 2026 guidance	consistent	consistent	consistent	consistent
EBITDA 2027e	7,848	7,910	7,788	7,914
NFD 31/12/2027e before new M&A	22,192	22,192	23,046	21,692
Leverage 31/12/2027e before new M&A	2.83x	2.81x	2.96x	2.74x

FCF_H126	Net FCF H1 2026 (actual)	(288)	EUR m	Amendment to 2025 URD - Half-year report 30/06/2026	26		High
FCF_g	Net FCF growth per year 2026-27	1.5%	%	Derived		Base = 2023-25 CAGR of net FCF (formula). Net FCF has been flat while EBITDA grew: capex and WCR absorb the growth.	Medium
CE_FCF27	Clean Earth incremental net FCF 2027	-	EUR m	Judgement		EBITDA ~EUR 0.2bn less capex, cash tax and interest on ~EUR 2.8bn of acquisition debt (net FCF is after interest) ~ zero. Replace with Enviri 10-K data.	Low
Shareholder and hybrid outflows							
DivPar26	Parent dividend paid 2026 (on FY2025)	1,099	EUR m	Amendment to 2025 URD - Half-year report 30/06/2026	14	EUR 1.50/share paid 13/05/2026.	High
DivGrowth	Parent dividend growth 2027	8.0%	%	Amendment to 2025 URD - Half-year report 30/06/2026	29	Guidance: dividend growth in line with current EPS, current net income +8% minimum.	Medium
DivMin	Dividends to minorities per year	257	EUR m	Consolidated financial statements 31/12/2025 / Amendment to 2025 URD - Half-year report 30/06/2026	7-8 / 6	FY2025 dividends paid (cash flow statement, 1,280) less parent dividend (H1-2025 key figures, 1,023).	Medium
DivCF25	Dividends paid FY2025, cash flow statement	1,280	EUR m	Consolidated financial statements 31/12/2025	8	Parent + minorities.	High
DivPar25	Parent dividend paid 2025	1,023	EUR m	Amendment to 2025 URD - Half-year report 30/06/2026	6	H1-2025 column. NB FY2025 column of the same table shows 895: inconsistency to raise.	Medium
Coup25	Hybrid coupons paid FY2025	121	EUR m	Consolidated financial statements 31/12/2025	8		High
Hyb25	Hybrid stock end-2025	4,100	EUR m	Consolidated financial statements 31/12/2025	74	Note 9.4.2, 'EUR 4.1 billion'.	High
HybRed	Hybrid redeemed Feb-2026	850	EUR m	Amendment to 2025 URD - Half-year report 30/06/2026	14	Already reclassified as debt at 31/12/2025 (FY25 p.74), so no further NFD impact.	High
DivBridgeH125	Dividends + coupons in H1-2025 NFD bridge	1,267	EUR m	Amendment to 2025 URD - Half-year report 30/06/2026	26	Equals 1,173 dividends + 94 coupons (cash flow statement p.36). Gives the H2 seasonal residual.	High
Buyback	Net buyback per year (capital reduction less share issues)	84	EUR m	Consolidated financial statements 31/12/2025	8	Guidance: buyback offsets employee plan dilution. FY2025: 402 - 318.	Medium
CapRed25	Share capital reduction FY2025	402	EUR m	Consolidated financial statements 31/12/2025	8		High
Shlss25	Proceeds on issue of shares FY2025	318	EUR m	Consolidated financial statements 31/12/2025	8		High
Disposals (asset rotation)							

DispTotal	Disposal programme	2,000 EUR m	Amendment to 2025 URD - Half-year report 30/06/2026	29	'EUR 2bn+ disposal program will be delivered by mid 2028.' Gross or net, and whether H1-26 disposals count, is not stated.	Medium
DispShare	Share of programme cashed by 31/12/2027	75.0% %	Judgement		Straight-line to mid-2028 from late 2025 gives ~80%; trimmed for back-loading of large disposals.	Low
DispShareH2	Of which in H2 2026	20.0% %	Judgement		Only EUR 73m of financial disposals in H1-2026 (p.27).	Low
DispMult	EV/EBITDA multiple of assets sold	10.00x x	Judgement		Each EUR of disposal also removes EBITDA from the ratio's denominator. No published multiple.	Low
EBITDA trajectory						
Org26	Organic EBITDA growth 2026	5.5% %	Amendment to 2025 URD - Half-year report 30/06/2026	29	Guidance +5% to +6%, mid-point.	Medium
FX26	FX effect on EBITDA 2026	(0.9%) %	Amendment to 2025 URD - Half-year report 30/06/2026	22	H1-2026 FX effect -0.9%, extrapolated to the year.	Low
Org27	Organic EBITDA growth 2027	5.0% %	Capstone Project Briefing	20	GreenUp 'organic growth of around 5% a year'.	Medium
CE_EV	Clean Earth price	3,040 USD m	Capstone Project Briefing	21	Briefing table. H1-2026 report (p.14) gives USD 2,989m closing price.	Medium
CE_Mult	Clean Earth EV / 2026e EBITDA post-synergies	9.80x x	Capstone Project Briefing	21		Medium
CE_Syn	Clean Earth run-rate synergies (year 4)	120 USD m	Capstone Project Briefing	21		Medium
CE_SynPh27	Share of synergies achieved in 2027	25.0% %	Judgement		Year 1 of 4; H1-2026 report says synergies begin in 2027 (p.13).	Low
USD_EUR	USD per EUR at closing	1.176 USD/EUR	Amendment to 2025 URD - Half-year report 30/06/2026	14	USD 2,989m = EUR 2,542m on 01/06/2026.	High
CE_Months26	Clean Earth months consolidated in 2026	7.000 months	Amendment to 2025 URD - Half-year report 30/06/2026	14	Closed 1 June 2026.	High
EBITDA27_ovr	EBITDA 2027 override (0 = use trajectory)	- EUR m	Capstone Project Briefing	20	Set to 8,000 to test the GreenUp target ('at least EUR 8bn in 2027').	-
Constraint and deal assumptions						
Lmax	Leverage cap at 31/12/2027	3.00x x	Capstone Project Briefing / Amendment to 2023 URD - Half-year report 30/06/2024	20 / 12	GreenUp: 'financial leverage less than or equal to 3x'.	High
Lguid26	Leverage guidance end-2026	3.00x x	Amendment to 2025 URD - Half-year report 30/06/2026	29	'3x or slightly above, Clean Earth included' - used as a validation check only.	High
DealMult	EV/EBITDA paid on new acquisitions	10.00x x	Capstone Project Briefing	21	Anchored on ~9.8x (Clean Earth) and ~11x (WTS minorities).	Medium
ProForma	Share of acquired EBITDA counted in 2027 ratio	- %	Judgement		0 = conservative (deal closes late 2027 or ratio uses reported EBITDA). Ask Veolia whether the covenant/guidance ratio is pro forma.	Low
FX_H2	FX / other on NFD, H2 2026	- EUR m	Judgement		H1-2026: -260 (p.26). USD share of debt has risen with Clean Earth.	Low
FX_27	FX / other on NFD, 2027	- EUR m	Judgement		Positive = debt increases.	Low
Rating cross-check (unverified - read the PDF before using)						
Moody_Fcst27	Moody's forecast FFO / net debt 2027	19.5% %	Moody's Credit Opinion 04/05/2026 (veolia.com) - NOT YET VERIFIED		Search-result extract only; the PDF could not be downloaded from this environment.	Low
Moody_Trig	Moody's downgrade threshold FFO / net debt ('below the high teens')	18.0% %	Moody's Credit Opinion 04/05/2026 (veolia.com) - NOT YET VERIFIED		'High teens' read as 18%. Agency wording, not a number: judgement.	Low

Legend: blue = sourced input; black = derived from other inputs; yellow fill = judgement call the group must defend.

Rating cross-check - is the agency trigger tighter than 3x? (LOW CONFIDENCE until PDF read)

Moody's forecast FFO/net debt 2027	19.5%	Moody's metric, Moody's-adjusted debt: not comparable with Veolia NFD.
Downgrade threshold (judgement on 'high teens')	18.0%	
Extra debt tolerable before trigger, as % of Moody's forecast debt	8.3%	FFO held constant: the acquired company's FFO would add back some room.
Applied to base-case NFD 31/12/2027 before M&A (proxy)	1,849	Proxy only: assumes Moody's forecast already embeds Veolia's plan.
Compare: leverage headroom at 3.0x, base case	1,353	
Which constraint binds?	3x commitment	To be redone once the Moody's and S&P reports are attached.
